rental
transport pose

We offer an **integrated rental, transport, installation and removal service of our QBLOCK®** shatterproof barriers for the delimitation and safety of events and displays, satisfying the ministerial provisions and organizational models imposed by recent safety directives.
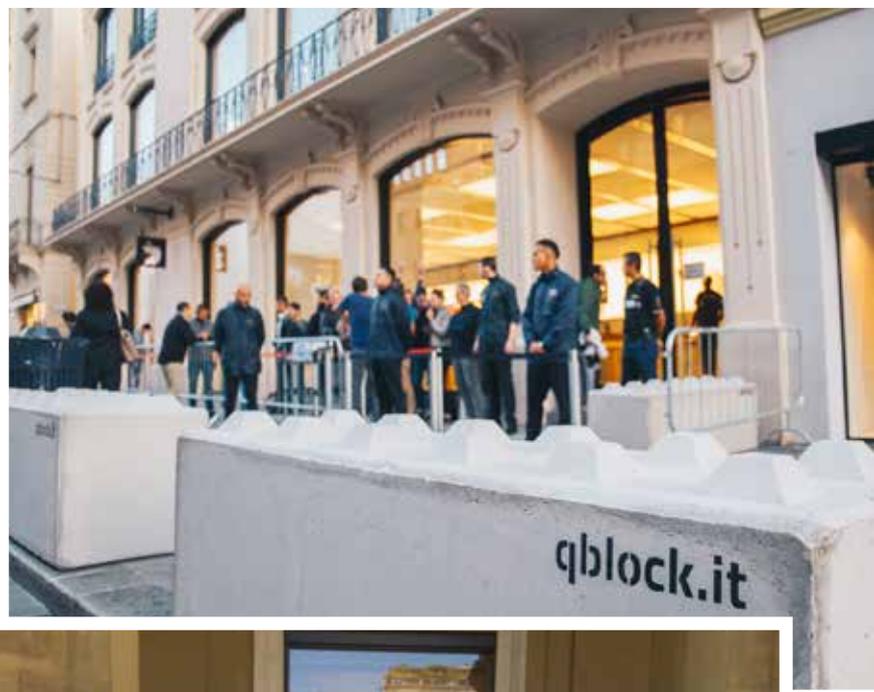

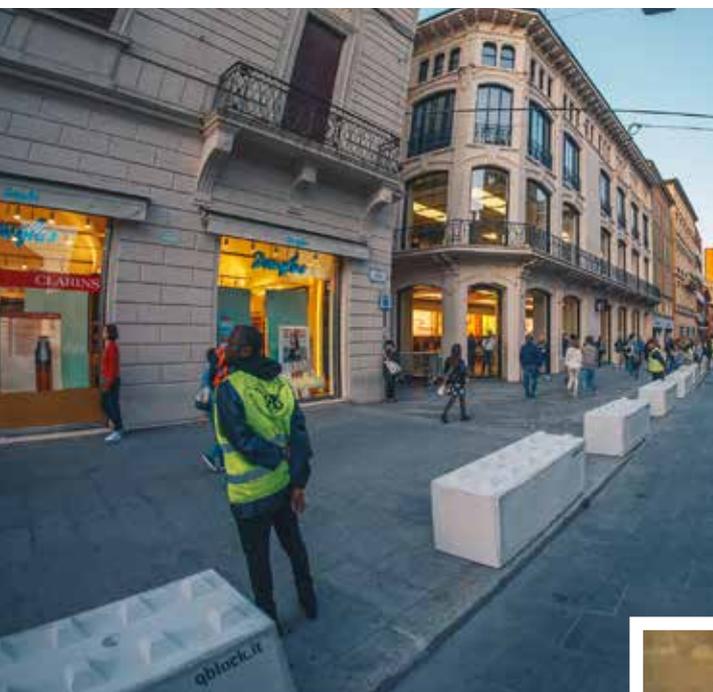

safety and security

With our QBLOCK® shatterproof barriers you protect large and small spaces **to guarantee the safety** of people and more.

it is possible to **create impassable areas** where equipment, vehicles and anything subject to theft or tampering can be stably and safely stored, temporarily or permanently.

A significant part of the **Circolare Gabrielli** on the safety of large events provides:

identification of new areas of respect and pre-filtering, in order to carry out checks on people, evaluating if possible the adoption of impediments, including physical ones, to vehicle access to pedestrian areas;

This extract highlights the fact that access to the event areas must be protected, both for people and for vehicles.
It is essential to create gaps to block access to vehicles through the use of mobile bollards, having technical characteristics that allow them to be installed and removed relatively quickly.
